“Let’s do a hands-on”

–Guille

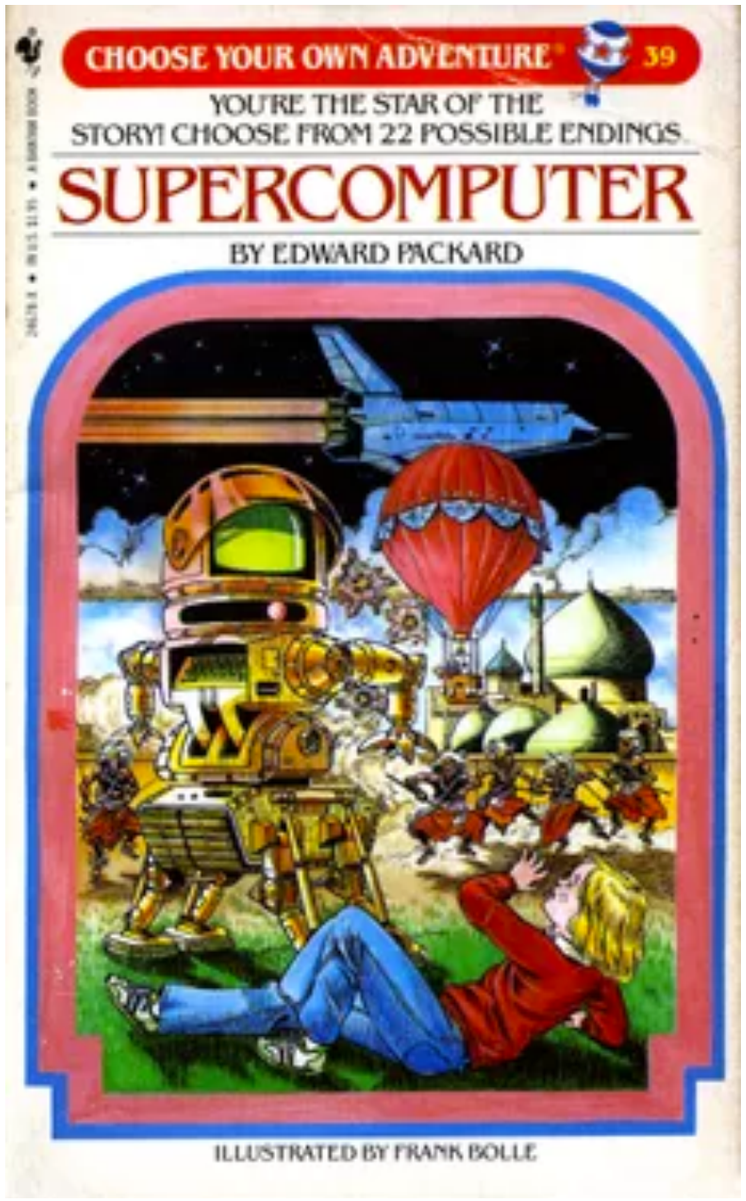
The Karate Kid

What are we going to do

- Clone Pharo using HTTPS
- Make a change/fix
- commit and push to a fork
- If we have time, open an issue and PR

Choose your own Talk

- Get your computer
- Or get next to somebody
- Or just listen to me



What you need

- Pharo 7 (we are going to download it, don’t worry)
- A Github account
- An internet connection
- Ideally, an already existing pharo issue-tracker account (https://bugs.pharo.org)

Getting Pharo7

- Launcher

http://www.pharo.org

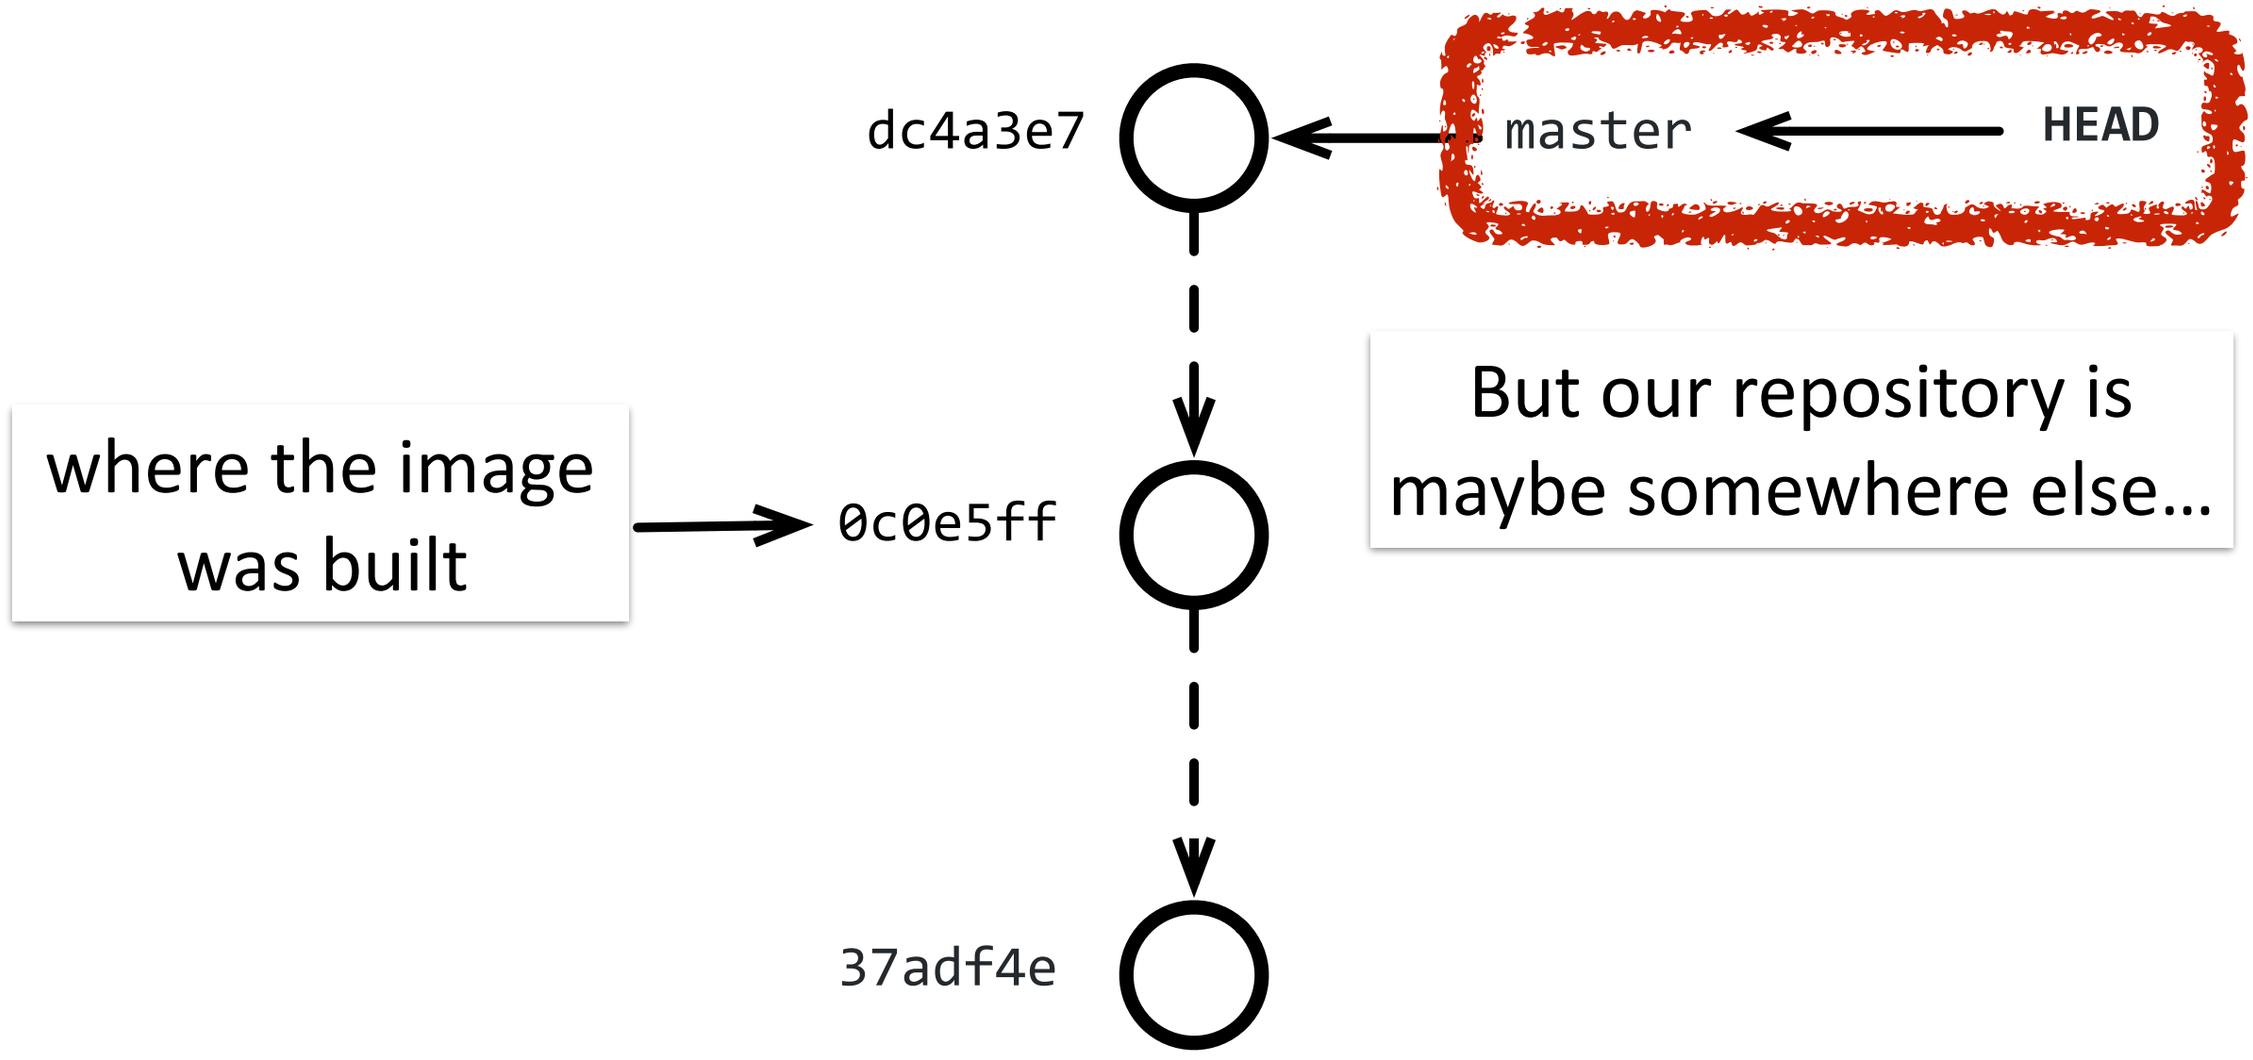
- Or for the terminalers

```
$ wget -O- https://get.pharo.org/70+vm | bash
```

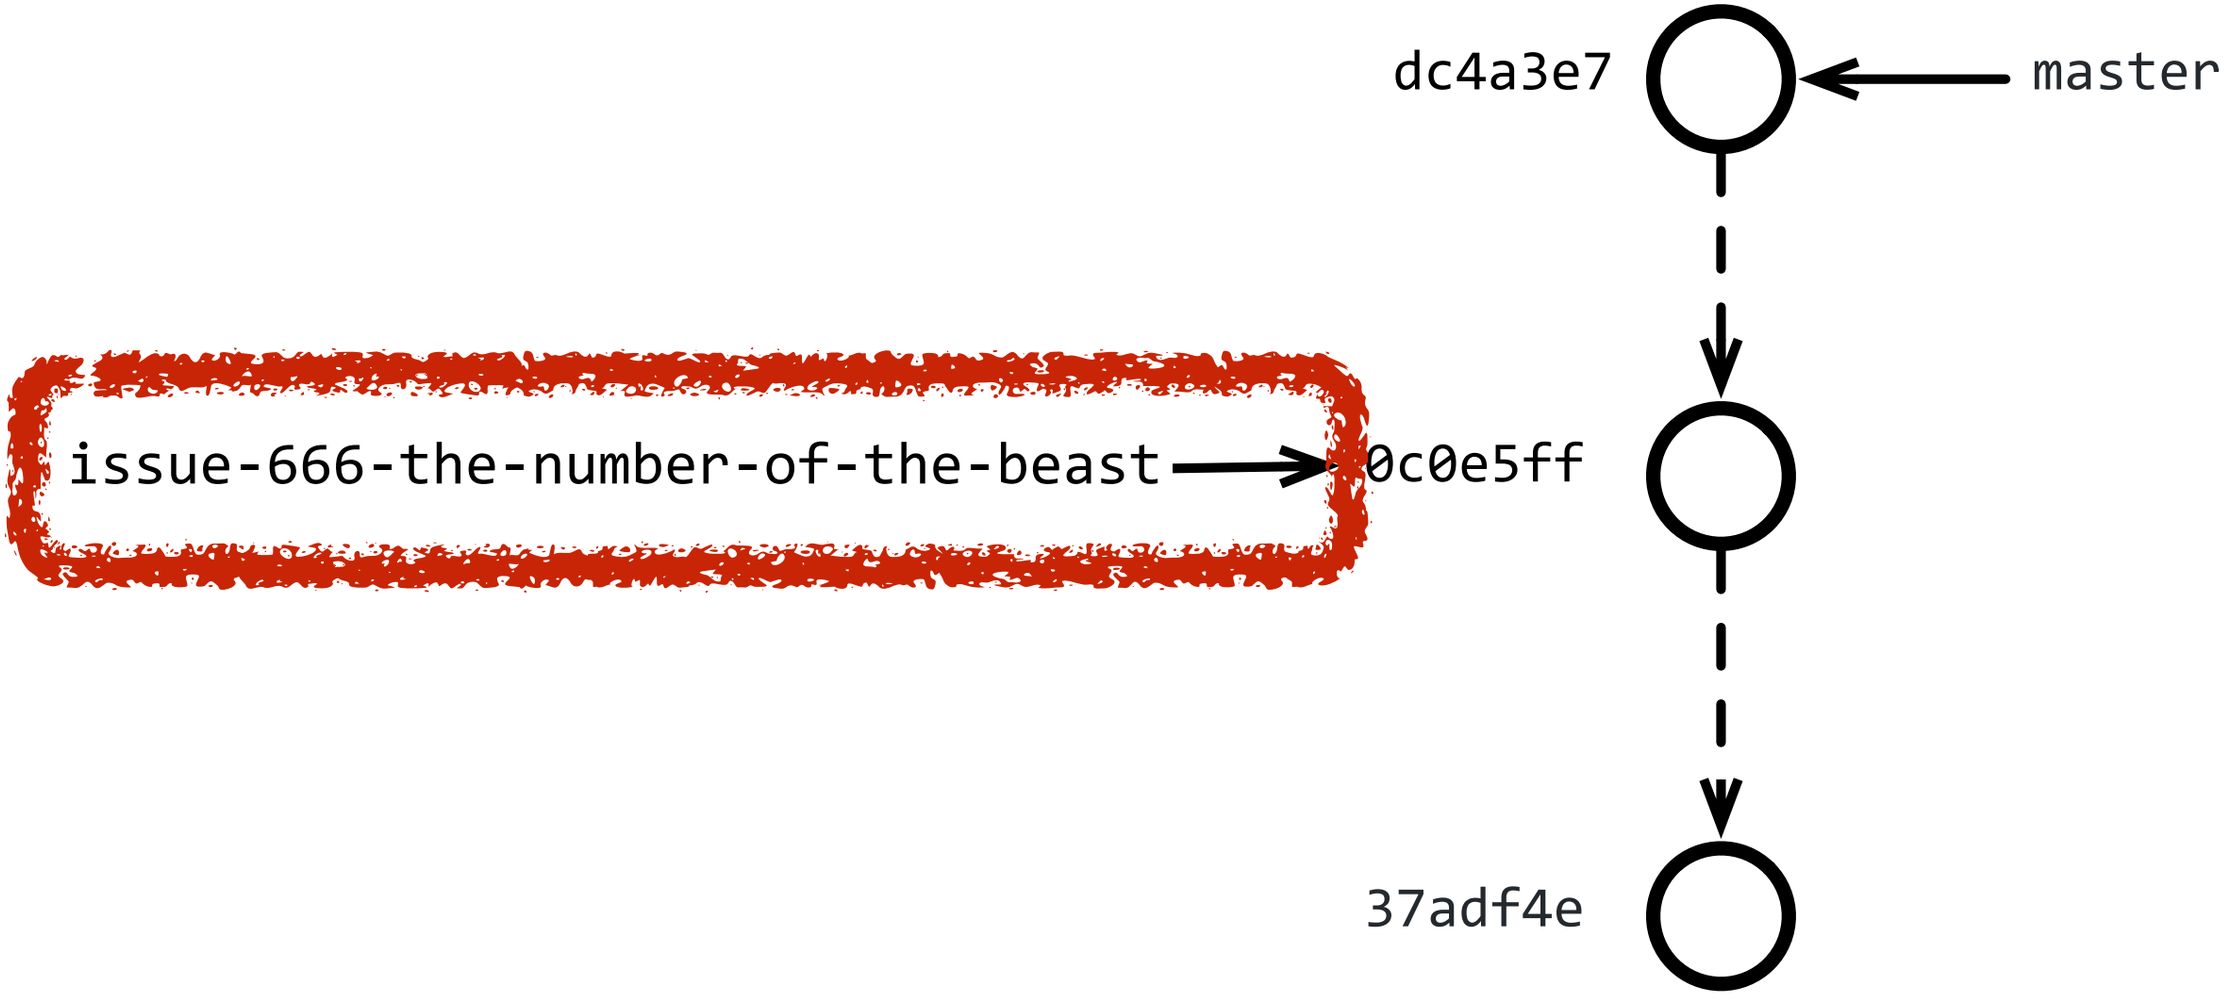
“And now we move to Pharo"
(i.e., demo time)

–Guille

Why branching



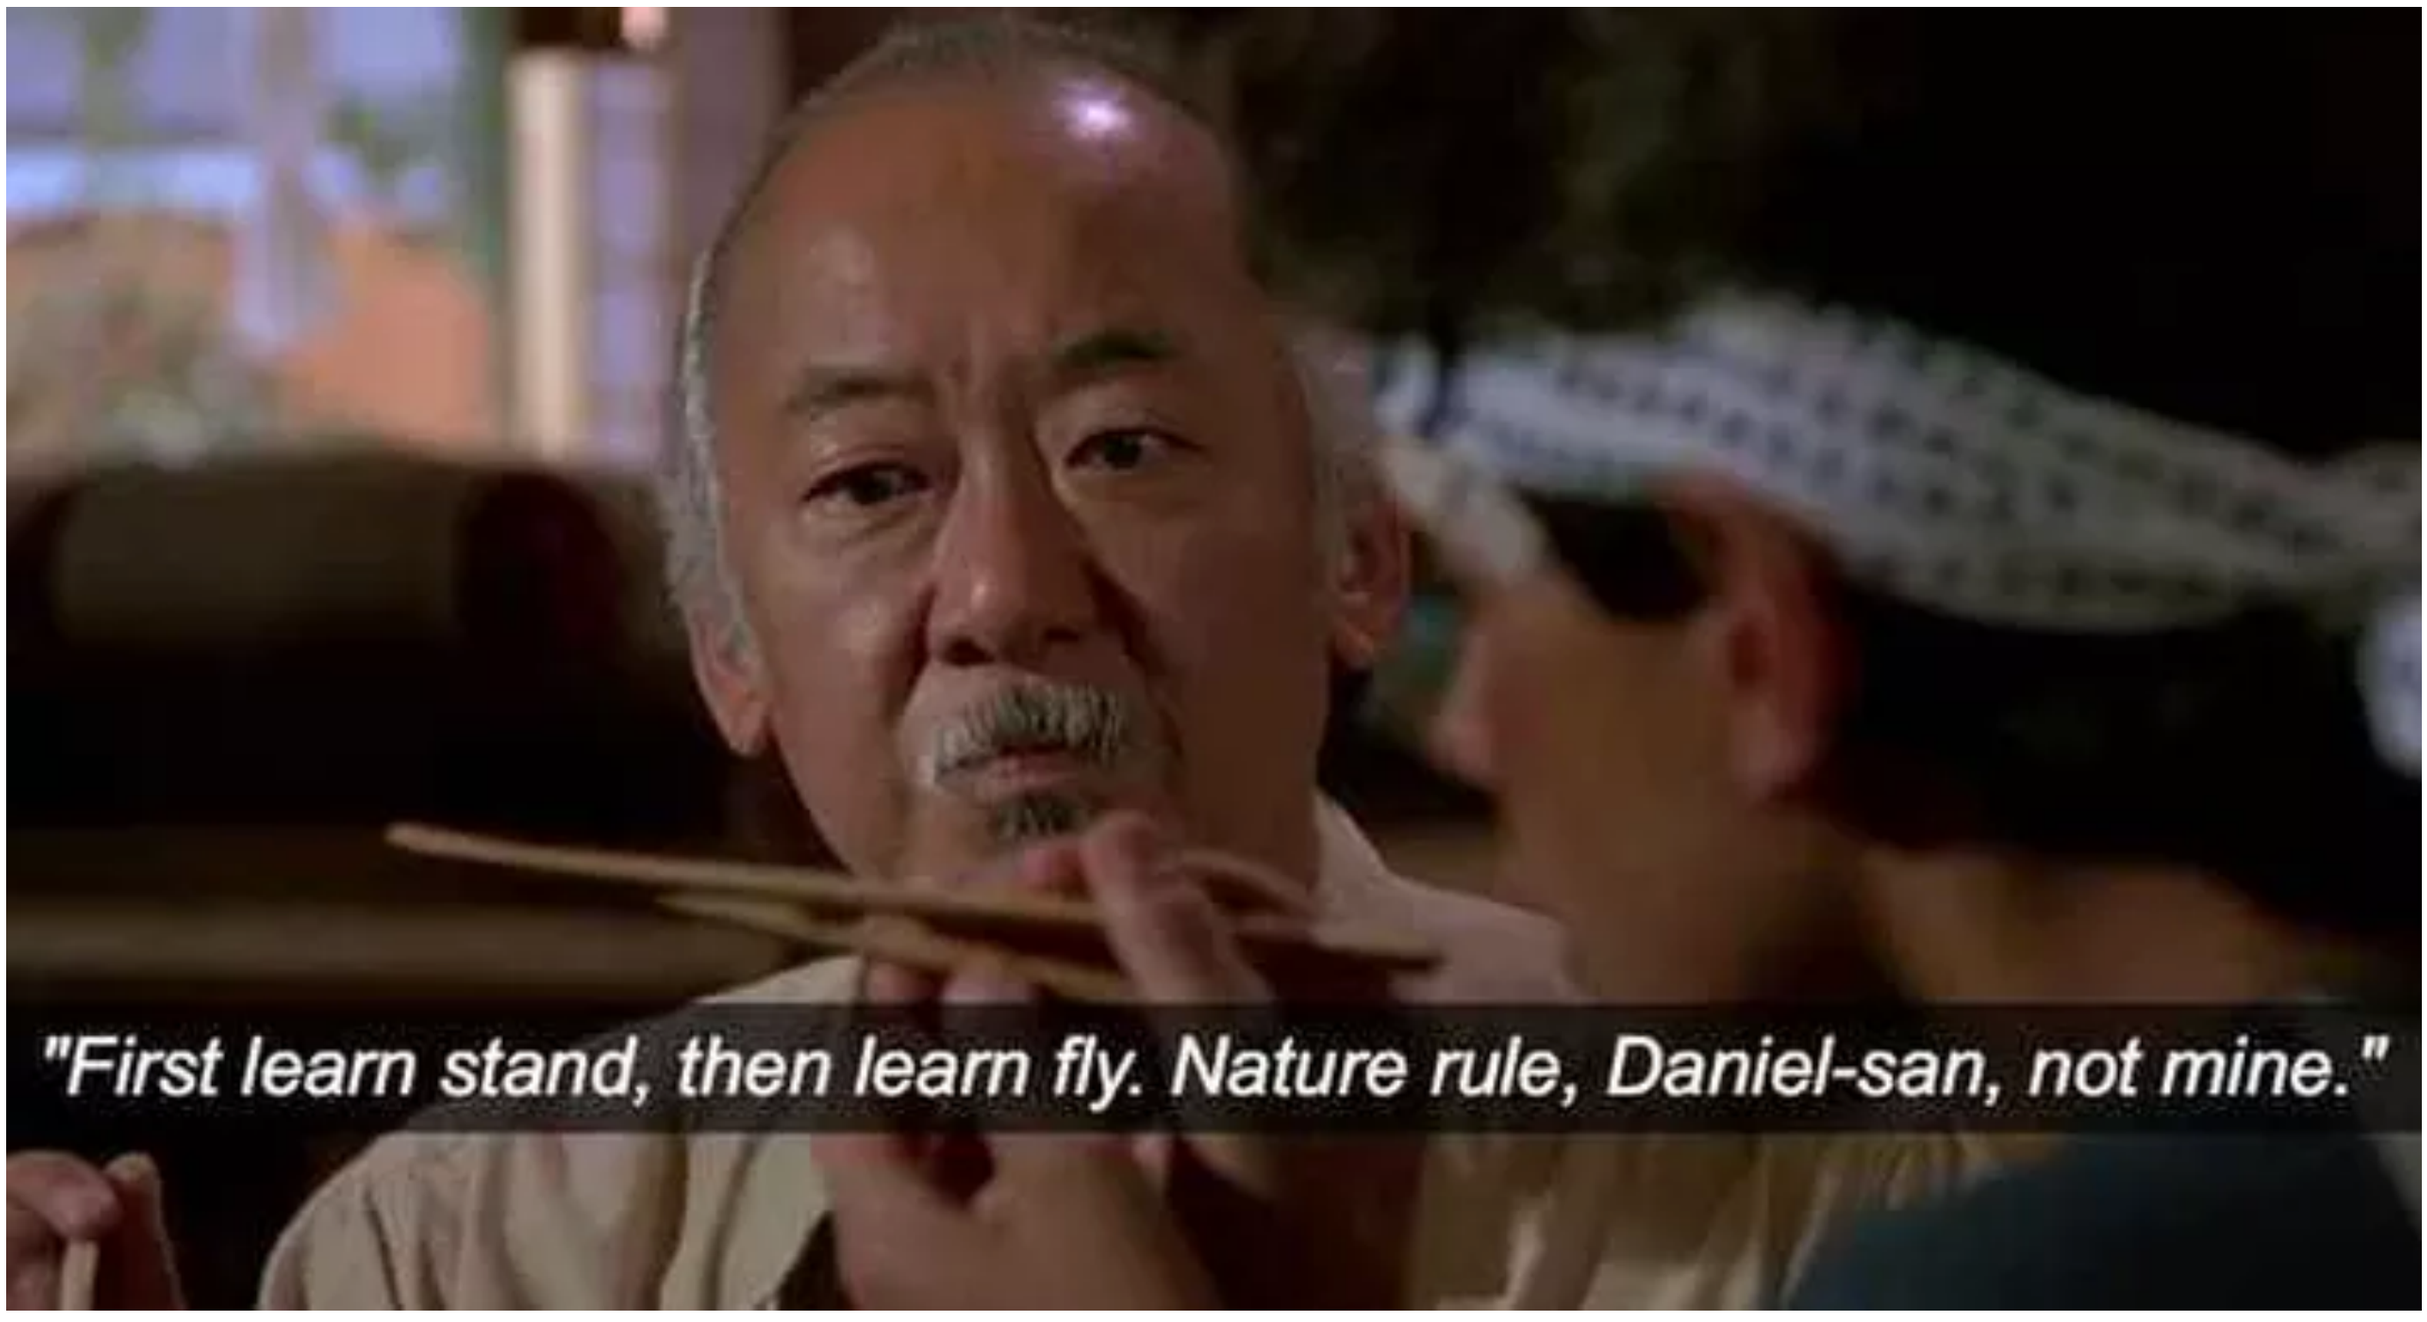
And this will lead us to…



“And back to the Pharo!”
(i.e., demo time again)

–Guille

One piece of advice for newbies like me



MAN WHO CATCH
FLY WITH CHOPSTICK
The Karate Kid
ACCOMPLISH ANYTHING

Pharo is **yours**
