VAST Platform 2025
14.0.0

Design it. Build it. Deploy it.

Create object-oriented software that's stable, easy to maintain, and deploys smoothly — all from the same comprehensive development environment.

Features planned for VAST Platform 2025 (14.0.0)

- Virtual Machine Improvements
- Unicode Library Enhancements
- Full Unicode Integration in Seaside
- Butter Unicode Development Tools
- Unicode Support for XML
- Multi-Monitor and High-DPI Improvements
- OpenSSL Updates
- Official SQL Server Support
- TableWidget integration with WindowBuilder Pro
- Multi-year GTK Development Continues

And dozens of other fixes and enhancements!

Thanks for attending!
